

Manufacturing Solutions

For over 30 years, IBC has been a trusted partner to diversified manufacturing companies, providing printing, labeling, bar coding, and track-and-trace solutions. As a full-service provider, we bring extensive experience in tracking materials and products throughout the manufacturing value chain. Our advanced technologies are designed to meet the evolving needs of today's manufacturers. IBC leverages 1D barcodes, 2D barcodes, sensors, and Radio Frequency Identification (RFID) to authenticate data across raw materials, work in progress, finished goods, and shipments—helping to prevent errors, ensure compliance, and guard against the introduction of illegitimate material. Our solutions integrate seamlessly with SCADA (Supervisory Control and Data Acquisition) and Enterprise Resource Planning (ERP) systems, enabling real-time visibility and control of labeling and tracking processes as part of broader industrial operations. By combining rugged equipment and software with North America-wide service and dependable consumables, IBC is the ultimate partner for manufacturers of all sizes seeking to improve traceability, efficiency, and reliability.
