

Fruit & Vegetable Industry Products

International Bar Coding (IBC) is a one-vendor solution to fresh fruit & vegetable producers for bar coding, labeling, automatic identification and data capture, automation, and traceability. IBC's solutions provide real time data for producers looking to track product from raw material to finished product.

Vine / Tree Harvest Tag

Whether you're producing fruit, vegetables, or other consumer packaged goods, IBC has a solution to bar code and tracks vines, trees, and plants. Whether you want to track plant date, harvest date, genetic information, harvest or picker data, IBC Tree Tags help you keep track.

PLU Labels

IBC PLU Labels are an FDA direct contact approved label solution to get Product Look Up codes directly onto fresh products. With dozens of sizes available and options like 1 colour, 2 colour, or 4 colour process, you can have individual fruits and vegetables ready for sale at retail.

Item Labels

Diversified produce companies have multiple formats for products and may find a need for item labels used on different packaging types. From can labels to flexible labels, jar labels to bag labels, or other container labels, IBC has a packaging label that will fit your product format.

Clamshell Labels

Clamshell labels help put your branding and product information in a convenient package in front of customers' eyes. IBC clamshell labels are available in hundreds of sizes in paper, synthetic, or clear material and with embellishments to help your product stand out.

Case Labels / RPC Labels

All cases of produce are required to have Case Labels or Reusable Plastic Container (RPC) labels to meet Safe Food Canadians Act (SFCA) or Produce Traceability Initiative (PTI) compliance. Ask us about label material options for IFCO RPCs, and cardboard cases.

Pallet Labels

IBC Pallet Labels help track cases of produce through the value chain by assigning specific cases to pallets and on to shipments and to customers.

Warehousing / Location Labels

Warehousing and Location Labels help track raw materials, work in progress, and finished products in all their forms in specific locations, assets, or warehouses. IBC Warehouse and Location Labels are available in all sizes including long range photo-reflective.

Fruit & Vegetable Industry Products

Label Printers

Partnering with all major manufacturers, IBC provides label printers designed for any application. Rugged industrial, space saving desktop, or portable connected printers IBC has a printer for you, and with extended service options you rely on IBC for parts and service.

Label Applicators

IBC Label Applicators are no-frills high-volume label dispensers designed for batch application of labels from wrap labels for beer cans to air blow, tamping, tamp and roll, and corner wrapped labels.

Printer Applicators

IBC Printer Applicators are high speed print and apply solutions designed inline automatic print. Scalable from Label Applicators, IBC Printer Applicators are capable of integration into a machine vision and traceability solution and is available with Non-Production Loss (NPL).

Scanning, Inventory Management & Tracking Software

Once bar codes are on labels, and labels are on products, IBCs work isn't over. When you need to track, scan, QC, audit, assign to location, or assign to shipment and customer, IBC has the scanners, software, and database solution for complete end to end track and trace.

Human Machine Interfaces and Rugged Computing

IBC provides the tools for computing in difficult environments. With rugged handheld Mobile Computers, bulletproof Human Machine Interfaces, and Secure Vehicle Computers you can scan, look up, and enter data from any environment.

RFID Solutions

IBC Radio Frequency IDentification solutions gives you all the tools for non-line of sight scanning with custom RFID Labels/Tags, RFID Printers, RFID Readers, and RFID Portals. Whether you're tracking raw materials, work in progress, or finished products IBC has an RFID solution for you.

Receiving, Scanning & Weighing Station

IBC provides all the tools needed to track bulk bins of fruit and vegetables. Whether you're receiving or assigning with an IBC receiving station you can track on a per bin basis as well as track via weight and bar code.

Bar Code Verification Systems

In order to ensure product and traceability codes are scannable at retail, a bar code verifier provides a cost effective solution to ensure proper printing of bar codes. IBC Bar Code Verifiers help reduce the likelihood of retailer chargebacks and ensure products are scannable at retail.

Environmental Data Collection

IBC provides data capture systems, data loggers, and weather stations in a broad range of indoor and outdoor applications. Used in many different industries to capture data in the field, in the warehouse, in cold storage, and in transportation.
