

# IBC Lumber Wrap Staple Tabs

*Tear Resistance Protection for Stapled Lumber Wrap*

**IBC Lumber Wrap Staple Tabs** are engineered to provide a reliable and efficient fastening solution for industrial packaging and material handling applications. Specifically designed to protect lumber wrap, these strips help prevent staples from blowing through or causing tear-out when securing wrap to packs of wood products. Built for durability and consistent performance, they support secure bundling in high-volume lumber and wood processing environments. Supplied in 8" roll size they help improve productivity while reducing downtime from frequent changeovers. Made from plastic free coated paper, IBC Lumber Wrap Staple Tabs provide a cost effective solution for ensuring wood products are delivered and ready for retail.
