

Mobile Bar Code Verification

Production Database Lookups in Real Time

IBC's Mobile Bar Code Verification software allows all users in a value chain to authenticate product information against shared product databases. Using 1D Bar Codes, 2D Barcodes, or Radio Frequency Identification (RFID) to conduct data scans, operators can retrieve product information for Receiving, Quality Control, Audits, Packaging, or Shipping. With access control and authentication privileges you can control what information is retrievable to users. Available in on-premises or cloud solutions, IBC's Mobile Bar

Code Verification gives you the tools to Scan/Read or Scan/Read/Write in a secure environment and keeps product data at the fingertips of those that need it.

Designed For:

- Industrial Manufacturers
- Wood Products Producers
- Distributed Supply Chains
- Pharmaceutical Production
- Consumer Packaged Goods
- Federal Agencies
