

# Vine / Tree / Plant / Row Tag

Cost-Effective Vine Bar Coding for Inventory Management & Traceability

Being able to bring inventory and supply chain management into the vineyard has always been an advantage large scale growers have held over competitors. By using vine tags applied on vines even the smallest of vineyards and growers can get the tools to better understand their supply chain and make more informed decisions. Using handheld & mobile computers to scan bar coded tree tags allows growers to understand workflow efficiency in the field, inventory, and detail precisely which products they are shipping. Rather than being the grower unable to authenticate the supply chain, you can authenticate individual vines and grapes and join the industry led effort to help identify quality products. Contact us to learn how to become traceability compliant or how to take the next step to track and trace your crops correctly.

## Benefits:

- Designed for Vineyards, Wineries, Orchards, Tree Fruits, Cannabis, and Farms.
- Budget conscientious inventory management and supply chain management
- Enables Traceability compliance
- Chemical and UV resistant

## Features:

- 1" x9" Standard Size
- Made from high-density print-grade polyethylene film (HDPE)
- Printable with Graphics, Logos, Barcodes and Text
- UV stable

## BC Traceability Grant

The On Farm Food Safety and Traceability Program (OFFST) is a BC program created to increase BC's ability to record farm food status, in order to better meet emerging food safety standards. The OFFST gives BC agrifood businesses funding to test their products and to utilize healthy practices. The program is supported by the Governments of Canada and British Columbia.
